

How would you like to pay \$10 OR LESS FOR A 30 DAY SUPPLY OF YOUR LOW COST GENERIC PRESCRIPTION?

After you have received your low cost generic drug prescription from your medical provider you are ready to get it filled. You may think that the savings stops here with your low cost generic prescription but you may be able to save even more. If you have an insurance plan that covers prescriptions, your copay for low cost generic drugs is usually less than if your prescription was for a name brand drug (drug still under patient protection). This of course is the reason you wanted a low cost generic drug in the first place. The copay for name brand may be \$50 and the copay for low cost generic drugs may be \$25 or \$30 dollars. Some of the insurance plans with a low monthly premium do not cover medications at all and if you have one of these or if you have no health insurance coverage at all, you will really be interested in this.

How would you like to pay \$10 OR LESS FOR A 30 DAY SUPPLY OF YOUR LOW COST GENERIC PRESCRIPTION? Think this is too good to be true? Well think again because many times it is possible to get a 30 day supply of your prescription for \$10 or less.

Many of the big stores where you shop all the time have hundreds of low cost generic drugs for as little as \$4 FOR A 30 DAY SUPPLY. Here are just a few:
